

## Leuven 2024 Tournament - MCR

The tournament went ahead as planned in terms of dates and schedule. The organizers had to deal with some last-minute cancellations, which meant we had to have a referee playing. This did not disrupt the event.

The hall was spacious enough. We were well seated. The various meals and snacks were good in terms of taste quality. A bar was accessible inside the building, in the room next to the one where we were playing.

Nothing happened to disrupt the weekend. Results were posted on time between rounds (except once, due to a technical problem).

One player asked me to pass on his satisfaction with the organization, which I do.

Another player told me about his frustration with the 1h50 rounds, which wouldn't allow all 16 games to be played each time. I don't think this channel is the best place to talk about this, which is what I told him. I also told him that one of the reasons for rounds of less than 16 games was the slowness of certain players.

All in all: a very enjoyable tournament!
